PROFESSIONAL SUMMARY

Qlik Sense & QlikView Developer with 2.5+ years of experience building and maintaining dashboards, reporting solutions, and BI workflows for banking and pharma clients. Skilled in Qlik load scripting, dashboard development, ad-hoc and periodic reporting, and Qlik Management Console (QMC) automation, backed by strong SQL and ETL fundamentals (Talend). Experienced translating business requirements into performant, production-grade Qlik dashboards, with hands-on exposure to Qlik telemetry/performance monitoring, cross-platform script migration (Power BI to Qlik), and multi-source data integration. Microsoft Azure and SnowPro Core certified. Immediately available.

CORE SKILLS

- Qlik Development: Qlik Sense (Primary), QlikView — dashboard design & development, Qlik load scripting, QVD management
- Administration: Qlik Management Console (QMC) — automation of scheduled reporting workflows
- Databases & SQL: Oracle, SQL Server, Snowflake, PostgreSQL — complex queries, stored procedures, query optimization
- ETL & Data Integration: Talend Studio/Runtime/Administration Center, data mapping, multi-source integration (on-prem & cloud)
- Reporting: Ad-hoc & periodical MIS reporting, KPI dashboards, banking-scale (core-level) data reporting
- Other: Qlik performance/telemetry monitoring, Power BI to Qlik script migration, GDPR/DPDP-aligned data governance

PROFESSIONAL EXPERIENCE

Developer — *Predoole Analytics (Client – Yes Bank)*

Feb 2024 – Aug 2026

- Developed and maintained Qlik Sense and QlikView dashboards for banking stakeholders, translating business KPIs into reporting solutions.
- Generated ad-hoc and monthly MIS reports handling large-scale banking datasets.
- Automated reporting workflows using Qlik Management Console (QMC), reducing manual reporting effort.
- Used SQL to extract, transform, and validate reporting data, resolving data-quality discrepancies before delivery.
- Collaborated with business users to understand reporting requirements and deliver analytics solutions.
- Built a Qlik Sense utility (QVD to CSV Automated Converter) to dynamically process QVD files and export configurable CSV partitions, reducing manual export effort.
- Built a Power BI-to-Qlik Sense script migration utility, translating dashboard logic across platforms to simplify cross-tool migration projects.
- Contributed to a Qlik Sense telemetry and performance monitoring framework — analyzing system logs to trace reload times, troubleshoot underperforming apps, and support proactive issue detection for Qlik Admins.
- Designed a Snowflake query monitoring and alerting framework (SQL, Streams, Tasks) to track ETL execution and warehouse performance.
- Led backend development for a Talend-based Consent Management Portal (GDPR/DPDP compliant), implementing Talend Data Catalog for metadata management and data lineage tracking.
- Maintained production Qlik Sense dashboards for a banking client and supported an Oracle-to-Azure Data Lake migration.
- Built ETL workflows migrating SAP data into Snowflake for a pharma client, reducing manual data-processing effort.

EDUCATION

Master of Computer Applications (MCA), Computer Science — NCRD Sterling Institute of Management Studies, Navi Mumbai | 2022 – 2024

B.Com — N.G. Bedekar College, Thane (Mumbai University) | 2019 – 2022

CERTIFICATIONS

SnowPro Core — Snowflake | Microsoft Certified: Azure Data Fundamentals (DP-900)
